*1 This minor amendment to WPAY-FM Application BPH-20070119ACD proposes Sect. 73.215 processing toward contingent WODB(FM) application BPH-20070119ACO, which is being simultaneously amended. The WODB(FM) application is being amended to request the new community of West Jefferson, OH, and increase the antenna COR to 100 meters HAAT. This amended WPAY-FM Class C0 downgrade and the WODB(FM) amendment are both proposing simultaneous §73.215 processing against each other. These two contingent applications are to be processed, pursuant to Section 73.3517(e) of the Rules, with one other contingent application(s): (1) WQEL(FM), facility ID #7112, Bucyrus, OH, which is filing an application to change its community of license to Richwood, OH, to replace service that would be lost by the relocation of WODB(FM), facility ID #30563, Richwood, OH, to West Jefferson, OH. All three Section 73.3517(E) contingent applications proposing changes in their respective facilities cross-reference each other in their respective Form 301-FM filings. Each application includes a copy of the agreement to undertake the coordinated facility modifications between the licensee of WODB(FM) and WQEL(FM) and the licensee of WPAY-FM.*

*2 This minor amendment to WPAY-FM proposes to maintain Section 73.213 status towards WLBC-FM, Muncie, IN. The proposed Class C to Class C0 downgrade will reduce an existing short-spacing of -11.9 km to -9.9 km as WPAY-FM is remaining at the same location. No interference exists or will exist as a result of this proposal. Full contour protection will be afforded the WLBC-FM facility as noted in Exhibit 27.1.*
