

Request for Expedited Processing

Winton Road Broadcasting Co., LLC (“Winton Road”) respectfully requests expedited processing of this application to further modify Construction Permit File No. BNPH-20060309ACN, as modified by BMPH-20110725AFV (the “CP”). Expedited processing is essential to Winton Road’s ability to construct the proposed facilities because the CP will expire on **October 31, 2011**. See *Letter from Peter H. Doyle to Lew Paper, Esq.*, Ref. No. 1800B3-IB (AD January 25, 2011), a copy of which is annexed as Attachment A to Exhibit 35 of this application.

Expedited processing is further warranted by Winton Road’s diligent efforts to construct the facilities authorized by the original CP, and as modified, which efforts were frustrated through circumstances beyond Winton Road’s control. Details of such facts and circumstances are set forth at pp. 1-2 and Attachments A-C to Exhibit 35 of this application, and are incorporated herein by reference.

In addition, as explained in Exhibit 35, expedited processing would permit Winton Road to timely construct facilities that would provide service to a significantly larger population than would be served by the facilities authorized in BMPH-20110725AFV. See Exhibit 35, pp 2-4. Accordingly, expedited processing would serve the paramount public interest in this case because it would allow Winton Road to commence operations of an improved facility before the October 31, 2011 expiration of the CP.
