RE: Certification of Antenna Position and Direction

Dear Mr. and Mrs. Hughes:

This letter is to certify that I have surveyed the position and direction of the installed FM radio antenna tower in the past months and that it is aligned with the specifications given in your Construction Permit at Facility # 172359 in Dahlonega, Georgia, according to results of the field measurements as listed below:

The antenna coordinates are: North Latitude: 34 deg. 33 min. 10 sec.  
West Longitude: 83 deg. 58 min. 05 sec.

The tower legs are oriented to True North at 10°, 130°, and 250°.

Thank you for this opportunity to serve your surveying needs.

Yours truly,

John T. Gaston, GA RLS #2821
