

## EXHIBIT 2

### Purpose of Application

By this application, CXR Holdings, Inc., licensee of WBLI(FM), Patchogue, New York, proposes to correct the station's geographic coordinates. This application is filed pursuant to *1998 Biennial Regulatory Review-Streamlining of Radio Technical Rules in Parts 73 and 74 of the Commission's Rules, Second Report and Order*, in MM Docket No. 98-93, FCC 00-368, 15 FCC Rcd. 21649 (2000) ("*Streamlining Order*"). In the *Streamlining Order*, the Commission concluded that licensees could use FCC Form 302-FM to correct coordinates where the correction would be less than three seconds latitude and three seconds longitude, provided the licensee has obtained FAA clearance and has registered the antenna structure. *See id.* at ¶ 34-36.

This correction is necessary due to a recent survey of the station's tower site. The survey, which was conducted in connection with the antenna structure registration process, revealed that the coordinates for the WBLI(FM) tower are slightly different from what was recorded based on earlier methods of measurement.

The license for WBLI(FM) (*See* FCC File No. BLH-19940614KA) lists the following coordinates:

40° 50' 32" North Latitude  
73° 02' 23" West Longitude

The correct coordinates and the coordinates listed on the FCC Antenna Structure Registration (Registration No. 1003317) and the FAA Determination of No Hazard (94-AEA-0328-OE) are as follows:

40° 50' 32" North Latitude  
73° 02' 25" West Longitude

All geographic coordinates are based on the 1927 North American Datum. No physical changes are proposed by this application. As such, all engineering information currently on file with the Commission with the exception of geographic coordinates remains accurate.
