

EXHIBIT 13-1

CONTOUR PROTECTION TO FM STATION KNKT

The proposed translator station will operate on 107.3 MHz., and must protect first adjacent channel FM station KNKT on 107.1 MHz. as follows:

The 60 dbu (50, 50) contour of the translator station and of KNKT may not overlap the 54 dbu (50, 10) contour of the other station. Full contour protection is provided by the proposed translator station as shown on the map below.
