

TECHNICAL STATEMENT
KVRW(FM), FACILITY ID 2894
CITICASTERS LICENSES, L.P.
RADIO MULTIPLE OWNERSHIP ANALYSIS -- 05/28/2004

This statement and the attached figures were prepared on behalf of Citicaster Licenses, L.P. ("Citicasters"), a licensee subsidiary of Clear Channel Communications, Inc. Citicasters proposes to acquire the facilities of KVRW(FM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Table 1: Proposed Commonly Owned or Controlled Stations Studied

| Call Sign | City | State | Freq | Status |
|-----------|---------------|-------|-------|------------------|
| KNIN-FM | WICHITA FALLS | TX | 92.9 | LIC |
| KZCD(FM) | LAWTON | OK | 94.1 | LIC |
| KLAW(FM) | LAWTON | OK | 101.3 | LIC |
| KVRW(FM) | LAWTON | OK | 107.3 | LIC ¹ |
| KWFS(AM) | WICHITA FALLS | TX | 1290 | LIC |

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission's multiple ownership rules².

Citicasters does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the existing facility of KVRW(FM).

Radio Markets

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. These mutually overlapping contours form one "radio market", as shown in *Figure 1*, for analysis under the Commission's rules.

Radio Market "1" is defined by the mutually overlapping principal community contours of KNIN-FM, KZCD(FM), KLAW(FM), KVRW(FM), and KWFS(AM). The predicted principal community contours of these stations (4 FM, 1 AM) are shown in *Figure 2*.

¹ This instant application.

² See 47 C.F.R. § 73.3555.

Count of Stations in Defined Markets

The number of radio stations in a "radio market" is determined by counting the operating, commercial stations having principal community contours that overlap or intersect the principal community contours that define the radio market, plus the subject commonly owned or controlled stations.

In Radio Market "1" studied herein, there are over 30 radio stations, including the subject co-owned stations, that overlap or intersect with the defined "radio market." *Figure 3* is the tabulation of the radio stations identified in the market.

In all figures above, stations currently owned by Clear Channel Communications, Inc. or its licensee subsidiaries are marked with an "*".

Only known licensed, operating commercial stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 45 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with § 73.3555(a) of the FCC Rules.

Sincerely,

Nestor Custodio
FCC Processing Administrator
Citicasters Licenses, L.P.
