PO Box 506
Bath, NY 14810

March 30, 2010

Certification Statement

I, James L Travis, being a duly qualified radio engineer, do hereby certify that I have overseen the installation of the directional antenna to fulfill construction permit BPED-20090812AAX for WCIG, Dallas, Pa, FID number 19564.

The directional antenna was designed, built, and tested by Propagation Systems, Inc. The antenna, model PSIFMR-2-HWS-DA has been installed according to the manufacturer specifications. The two antenna bays are indeed mounted at an azimuth of 43 degrees clockwise from true north and are correctly spaced from the tower as specified.

I state that I have been an engineer in the radio broadcasting business for 25 years and have overseen numerous tower and antenna installations, many of which have been directional arrays.

Sincerely,
James L Travis
Chief Engineer
Bath, NY

Signature James L Travis
