Re : Sanford transmitter

Dear Jeff,

Today we staked a line running from the center of the tower located on the Mount Hope Road, Sanford, Maine on an azimuth of 58 (fifty-eight) degrees. This is relative to True North. We tied orange survey ribbon on a six inch maple tree on the far side of the field so the person at the top of the tower can line themselves up. A second reference point is another transmission tower on that same azimuth 1,005 feet from the Maine Public tower.

I included two photographs on page 2 and an exhibit on page 3. Please let me know if you have any questions or need anything further.

Sincerely,

A handwritten signature in blue ink, appearing to read 'S. Salsbury', with a long horizontal flourish extending to the right.

Stephen R. Salsbury, PLS  
President

/s
