

**Compliance with Canadian Spacing Requirements**

The facility contemplated herein is located within 320 kilometers of the border between the United States and Canada. Internationally, the proposed facility is considered to be class "A". Under the terms of the Working Arrangement for the Allotment and Assignment of FM Broadcasting Channels Under the Agreement Between the Government of Canada and the Government of the United States of America Relating to the FM Broadcasting Service, as amended in 1997 ("Agreement"), Class A facilities must be separated from other stations which are separated by 0, 200, 400, or 600 kHz, and those separated by 10.6 or 10.8 mHz as follows:

Relation	Co-channel	200 kHz	400	600kHz	10.6/10.8mHz
A-A	132 km	85 km	45 km	37 km	8 km
A-B1	180 km	113 km	62 km	54 km	16 km
A-B	206 km	132 km	76 km	69 km	16 km
A-C1	239 km	164 km	98 km	90 km	32 km
A-C	242 km	177 km	108 km	100 km	32 km

The proposed facility is located approximately 125 kilometers from the Canadian border. The Canadian stations or allocations within 320 kilometers of the proposed operation are as follows:

Type	Ch/Class	City	Distance between sites	Distance Req'd by Agreement
USE	228B	Kingston, ON	146.77	206
OPE	228C1	Montreal, QC	282.27	239

NEW Kingston is short-spaced to the proposed facility by 63.23 kilometers, but as shown in Exhibit 26-2A, the proposed facility's 34 dBu F(50,10) interfering contour does not overlap the Kingston 54 dBu F(50,50) protected contour at any location.

Also note that the 34 db interfering contour does not enter Canada at any location.

Therefore, the WOKR proposed facility is in compliance with the Agreement.
