

Exhibit 345AM: Engineering Statement in support of  
FCC FORM 345

APPLICATION FOR CONSENT TO ASSIGN CONSTRUCTION PERMIT OR LICENSE FOR TV OR FM TRANSLATOR STATION OR LOW POWER TELEVISION STATION OR TO TRANSFER OF CONTROL OF ENTITY HOLDING TV OR FM TRANSLATOR OR LOW POWER TELEVISION STATION  
(For an Existing FM Translator)

This engineering exhibit supports the relocation of FM translator W239BZ (Facility ID 138555) from Sandy, FL to Gainesville, FL. The translator will be moved less than 250 miles and will be used as a fill-in facility for Class D AM station, WAJD (Fac. ID # 24209). Figure A shows that the W239BZ 1mV service contour will be entirely contained within the WAJD 2mV service contour as well as the 40km limit for AM fill-in service. Figure B is a close-up of the two contours at their closest approach to each other. A form 349 application to move W239BZ is being filed concurrently with form 345.

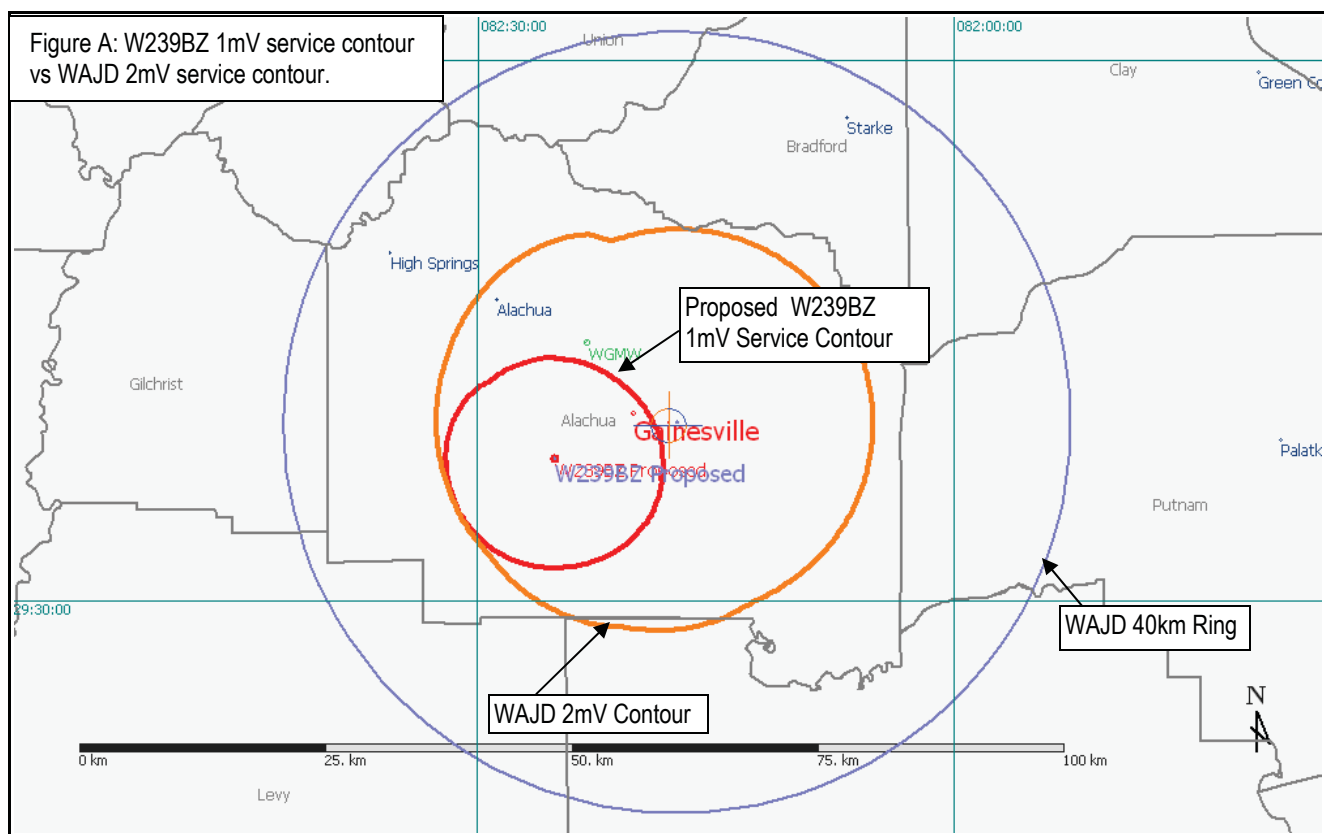

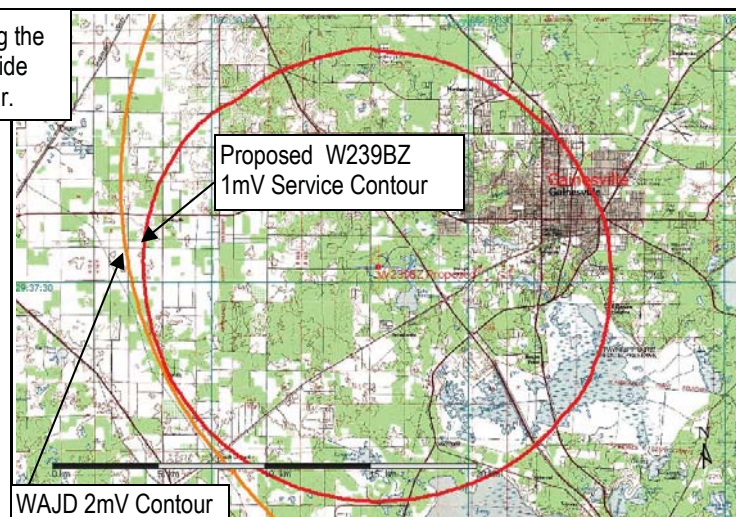

Figure B: Inset of figure A showing the W239BZ 1mV service contour inside of the WAJD 2mV service contour.

Respectfully submitted
