Re: York Professional Baseball Club, LLC
(YPBC)
WOYK(AM), York, PA
Facility Identification Number: 73873
Special Temporary Authority
BESTA-20170502AAL

Dear YPBC staff:

This is in reference to the request filed on May 2, 2017. YPBC requests a second extension of the STA granted on April 1, 2016, to continue to operate at night with DA parameters at variance using a shortened tower #3 (due to storm damage).¹ In support of the request, YPBC states that it did not replace tower #3 during the past six months, and is now considering filing an FCC Form 301 application to change the nighttime antenna system by permanently reducing the height of tower #3.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED, and YPBC may continue to operate at night with DA parameters at variance from licensed values and/or reduced power while maintaining monitor points within licensed limits, with no change to the licensed daytime operation (or ND at night with a maximum of 0.25 kW during replacement of tower #3, if that option is chosen). It will be necessary to further reduce power or cease operation if complaints

¹ WOYK(AM) is licensed for operation on 1350 kHz with 5 kW day (ND) and 1 kW night (DA).

of interference are received. YPBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310. YPBC must file the required FCC Form 301 application to permanently modify the nighttime antenna system using the shorter tower #3 height (unless that tower is replaced in the upcoming months, in which case an FCC Form 302 application must be filed to update all operating parameters).

This authority expires on **December 5, 2017**.

Sincerely,

A handwritten signature in blue ink, consisting of a large loop followed by a series of smaller, connected loops and a final upward stroke.
