

RADIO MARKET ANALYSIS
WVKX-FM RADIO, LLC
WVKX RADIO STATION
IRWINTON, GEORGIA
WXKO RADIO STATION
FORT VALLEY, GEORGIA
April 2008

TECHNICAL STATEMENT

1. This technical statement and attached exhibits were prepared on behalf of WVKX-FM Radio, LLC (“WRL”). WRL is the proposed assignee of station WVKX, Channel 279A, Irwinton, Georgia¹ and WXKO, 1150 kHz, Fort Valley, Georgia. Principals of WRL also have an attributable interest in the license of FM station WFXM, Channel 296A, Gordon, Georgia. WXKO is licensed to a community within a metro county in the Macon, Georgia Arbitron Market. WVKX and WFXM are not licensed to a metro county in any Arbitron market, but have city grade contour overlap.² Further, WFXM is considered “home” to the Macon, Georgia Arbitron market. Therefore, this review will verify compliance of commonly owned stations in both rated and non-rated markets.

MACON, GEORGIA ARBITRON/BIA MARKET REVIEW

2. As shown on Exhibit #1, there are thirty AM and FM (commercial and non-commercial) stations listed in the Macon, Georgia Arbitron Market (Market #155). WRL would control two stations (one AM and one FM) in the market. The number of stations indicated falls

-
- 1) There is a pending application proposing a relocation of WVKX to a new site, which is also considered in this instant review.
- 2) Since neither of the FM contours reach the WXKO contour, it is not considered in the non-rated market for the purposes of the analysis.

in the thirty to forty-four stations tier of §73.3555(a)(1)(ii) of the Commission's rules. At this level, common ownership or control of up to seven stations, with no more than four in the same service, is permissible. Therefore, WRL is in compliance in the rated Macon, Georgia market.

REVISED CONTOUR OVERLAP ANALYSIS

3. Since the WVKX (licensed and application) and WFXM city grade contours overlap, a study has been conducted to verify that the ownership of these two stations, in conjunction with the other stations in the immediate area in which WRI has an interest, is in compliance with the Commission's revised contour overlap rules. The city grade contours of all the subject stations are shown on Exhibit #2. The city grade contours of the two FM stations will establish the "Radio Market Boundary". No stations with transmitters located more than 92.0 kilometers from the boundary of the common overlap of subject stations will be considered. Further, no other facility controlled by WRI will be considered as a market contributor, unless it is a subject station in the radio market under study.

4. Exhibit #3 is a depiction of the AM and FM stations (commercial and non-commercial) providing service to the Radio Market boundary, including the two subject stations. A total of five stations is shown. Exhibit #4 is a tabulation of the stations in the Radio Market. The number of stations indicated falls in the fourteen or fewer stations tier of §73.3555(a)(1)(iv) of the Commission's rules.³ At this level, common ownership or control of up to five stations,

3) There are additional stations providing service to the market, but they were not considered since the stations identified are sufficient to allow for common control of the stations that will be commonly owned.

with no more than three in the same service, is permissible, provided the number of stations to be commonly held does not exceed more than 50% of the stations in the subject market. Therefore, WRI is in compliance in the revised contour overlap market.

5. Based on the compliance shown in both the rated and non-rated markets, the proposed assignment of WVKX and WXKO to WRI is in compliance with the Commission's rules, as it relates to the markets reviewed.

6. The foregoing technical statement was prepared on behalf of WVKX-FM Radio, LLC by Graham Brock, Inc., its Technical Consultants. All information contained herein is true and accurate to the best of our belief and knowledge. All data relating to AM and FM facilities in the relevant BIA/Arbitron market was determined using the BIA Financial Network, Inc., Media Access Pro, Version 4.2. BIA database. Technical data related to AM and FM facilities was extracted from the Commission's CDBS database. We assume no liability for errors or omissions in either database which may be adverse to the information contained herein.
