In re: Low Power Television Application of:
Elko Television District
Channel 33, Starr Valley, NV.
BPTT-20040726AEL
Facility Id No.: 128762

Dear Applicant:

On November 4, 2005, the licensee as addressed above was sent a letter outlining the following issue concerning the analysis of the above-referenced construction permit:

Our preliminary engineering review reveals that your proposed facility 74 dBu contour does not overlap with the 74 dBu contour of the licensed facility file number BLTT-20040520AAO. The contours as referenced above must overlap in order for the proposed modification to be considered as a Minor Change.

You are given the opportunity to file a minor amendment to resolve the specified 74 dBu contour problem within (30) days from the date of that letter. If not so resolved, your application will be considered incomplete and subsequently dismissed.

The amendment filed on December 2, 2005, did not resolve the protected contours issue. Our current engineering analysis considering the amendment shows that the contours still do not overlap, therefore the above-referenced application is considered incomplete and IS HEREBY DISMISSED.

Sincerely

Hossein Hashemzadeh
