"\*\*Affixed to 'IN' or 'Out' values = site inside protected contour.

ERP and HAAT are on direct line to and from reference station.

"«" = Station meets FCC minimum distance spacing for its class.

---

**Exhibit 12 (Compliance with CFR 74.1204)**

---

The proposed FM Translator is located within the protected 60 dBu contour of second adjacent channel station WCDX channel 221B1, Mechanicsville, VA. The predicted F(50-50) field strength of WCDX at the proposed translator site is 89.6 dBu, *see Exhibit 12A*. Therefore, the respective predicted interfering contour generated by the proposed FM Translator is 129.6 dBu. This interfering contour extends less than 11 meters from the proposed transmit antenna, and the area of overlap does not reach the ground.

Therefore, RTN respectfully requests a waiver of C.F.R. 74.1204 based on no population within the area of predicted interference.
