*Note: The “percent of total assets” is based on the capital contributions of each member. Each member also is entitled to a percentage of profits that is different from the percentage of capital contributed by such member. Because there are no multiple ownership issues present in this application involving the Commission’s “equity-debt-plus” calculation, and due to the difficulty of calculating the percent of total assets based on a combination of the members’ percent of capital contributed and percent of profits, the percent of total assets reported for these members is based solely on their capital contributions.
