Re: Add offset request.

Dear Sirs:

Robert Adelman ("Licensee") of KTRO-LP Lancaster CA, is applying for a move to channel 50 with an ERP of 26kW. This will cause 1.5dB of interference to your facility K50AR, serving Lone Pine, CA. To prevent this interference offset can be added to K50AR's facility. Currently the required dB is 45.0 and the Actual dB is 43.5, very minor. If this is not a problem to you, you can instead furnish us with a no objection letter to KTRO-LP proposed facility. We eagerly await your response.

Respectfully submitted,

ABACUS TELEVISION

.....
