

## Discussion of Compliance with **Special Operating Condition or Restriction** Placed on CP.

The proposed auxiliary facility for WSOC-FM proposes to co-share the auxiliary antenna of WNKS licensed under file number BXMLH-20090429AAH. The WNKS antenna, recently replaced, has been in existence since 1989 on an un-driven, base insulated tower which is part of the WFNZ(AM) array. No changes in the antenna or on tower components are being proposed to accommodate the shared use. A switch has been installed at the transmitter location to be able to select the single auxiliary use by either WSOC-FM, WKQC, WBAV-FM, WNKS, or WPEG.

Since no structural or electrical changes to the tower structure or antenna are being proposed, it is not anticipated that there will be any adverse effects to the patterns of WBAV and WGFY. Therefore, the applicant believes to be in compliant with the special operating condition placed on the underlying Construction Permit and that no partial proofs should be necessary.
