

TECHNICAL NARRATIVE

Applicant, E-String Wireless is filing this application to modify the current granted CP FCC file number BNPH-20050103AHW.

Applicant proposes to move the current transmitter site for Lufkin, Texas to 31 – 23 – 00 N, 94 – 47 – 50 W.

COMMUNITY COVERAGE

This proposal provides for 100 per-cent coverage of the community of license and is shown in Exhibit 23.

SEPARATION REQUIREMENTS

Exhibit 25.1 is the spacing study. As shown in Exhibit 1 the coordinates in this application are fully spaced to the alternate reference coordinates for Mount Enterprise, Texas specified in the permittee's March 28, 2005 comments in MB Docket 05-34. As shown in the attached statement filed with the FCC April 12, 2005, the proponent of the Mount Enterprise allotment has agreed to these alternate reference coordinates.

ENVIROMENTAL

This proposal complies with maximum permissible RF exposure limits for controlled and uncontrolled environments. This proposal will not have a significant environmental impact.

OTHER

Applicant has filed the necessary paperwork with the FAA to construct a tower at the previously stated reference point. The proposed tower will be registered in the ASR database when the FAA has issued a study number and determination.
