From: "Bullard, Ransom" <RanBullard@Clearchannel.com>

To: Frank Lanzone <frank@kcbx.org.>

Frank,

We have learned that KSBX of Santa Barbara, California proposes to install a 6 meter (total height above ground) tower at a distance of 0.56 kilometers from our KTMS (AM) antenna towers. Considering that the proposed tower is quite small and that there are other taller vertical obstructions in close proximity, we do not feel the need to require that KSBX carry out skeleton proofs before and after the KSBX tower is installed. Therefore, we have no objection, at this time, to the KSBX proposal.

Signed

Ran Bullard
