

Affidavit on Directional Antenna Installation
KRAN
Warren Air Force Base, WY
Construction Permit BMPH-20090309ABS

On June 19, 2009, I oversaw the installation of the directional antenna system for KRAN. I certify all installation instructions were followed. All parasitic elements were measured and positioned as specified by Shively Labs. No major problems were encountered during the installation.

I have been a broadcast engineer for 11 years. During that time, I have overseen the installation of many FM antennas, of varying sizes and locations. I have also received instruction from Shively Labs in the correct installation of their directional antennas.

Respectfully Submitted,

A handwritten signature in black ink, appearing to read 'Aaron Ishmael', written in a cursive style.
