**Re: WWWK, Islamorada, FL (FID 34355)
Request for Engineering STA**

Dear Audio Division:

On behalf of Universal Broadcasting Network LLC (“Licensee”), FRN 0021029368, we hereby submit the following Request for Engineering STA for WWWK(FM), Islamorada, Florida, FID 34355.

Licensee has been operating under Engineering STA File No. BSTA-20180223AAI, extended through August 19, 2022 by Engineering STA Extension File No. BESTA-20220216AAF. By way of background, the WWWK(FM) main facility was rendered inoperable from issues related to Hurricane Irma in the Fall of 2017. Licensee has a construction permit which was granted on December 18, 2019 to relocate to a permanent facility, FCC File No. BPH-20190924ACX. The WWWK transmit antenna was to be located at a tower associated with ASR No. 1308371 at Tavernier, Florida.

Unfortunately, due to circumstances beyond Licensee’s control, WWWK(FM) must relocate its tower site. Licensee has identified a new tower sight which is 25 miles north of the original STA site (the closest available tower Licensee could locate in its community of license). The Licensee has been working extremely hard to find a permanent site for the tower and to remain on the air to serve and support their community of license. Licensee respectfully requests modification of the current Special Temporary Authority to operate from a farm located at 19465 S.W. 336 Street, Homestead, Florida 33034, using a 60 ft. tower with 500 watts, antenna model #JAV3DIR.
