ENGINEERING REPORT

Willow Creek, CA, FM Minor Modification for New Station

EXHIBIT 24 –ENGINEERING STATEMENT REGARDING SECTION 73.315

Figure 2, attached, is a map showing the proposed transmitter site on Horse Mountain, the predicted 70 dBu F50,50 service contour, and the community boundary of Willow Creek, CA. The 70 dBu service contour covers 92% of the land area, and 100% of the population (from Census year 2000) of the community of Willow Creek. This is in compliance with Section 73.315 and/or the long-standing FCC Policy of serving 80% or more of the licensed community with the 70 dBu city-grade service contour. Furthermore, Horse Mountain is located on the only established antenna farm that serves the Willow Creek community, and is at one of the highest elevations within the community boundaries of Willow Creek.
