

Exhibit E-1

Compliance with 47 C.F.R. Section 1.1306  
KMLD Casper, Wyoming

KMLD is currently licensed to operate on channel 247C1 with 18 KW ERP at 540 M.

KMLD is seeking to one step downgrade its operation to channel 244C2. This will reduce its ERP to 2.85 KW. KMLD proposes the use of its current antenna system, a six bay half waved spaced circular polarized Armstrong (FMA-727H-6C). This system is currently fully authorized for use at the 18KW ERP power level and meets all ANSI requirements. Thus, it can be concluded that with the lower ERP, same antenna system, and the same height above ground, that this new operation will remain in compliance.
