Program Test Authority

Dear Applicant:

This letter is in reference to KPSV-FM's request for program test authority ("PTA") filed September 11, 2013 and the simultaneously filed application for license to cover Construction Permit BNPED-20071022ANE, as modified by permit BMPED-20130717AOZ. The PTA request included exhibits demonstrating compliance with special operating conditions regarding the directional antenna.

A review of KPSV-FM's request for program test authority reveals that the facilities were constructed pursuant to the terms and conditions of Construction Permit BMPED-20130717AOZ, and the provisions of 47 C.F.R. § 73.1690(c)(2). Accordingly, Program Test Authority IS HEREBY GRANTED to commence operation pending further action on KPSV-FM's license application. The maximum effective radiated power is 25 kilowatts (H) and the transmitter power output is 2.85 kilowatts.

Sincerely,
