Re: Clark Media, LLC (CML)  
WATX(AM), Hamden, CT  
Fac. ID No.: 42658  
Special Temporary Authority (STA)  
BESTA-20211004AAJ

Dear Mr. King:

This is in reference to the request filed on October 4, 2021. CML requests an extension of the STA granted on April 14, 2021, to continue operating from an alternate site with a long wire antenna to allow time to file the required FCC Form 301 application due to loss of the licensed transmitter site earlier this year.<sup>1</sup> In support of the request, CML stated that additional time is needed to file the application..

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of the STA IS HEREBY GRANTED, and CML may continue to operate with the following facilities:

Geographic coordinates	41° 22' 40" N, 72° 57' 05" W (NAD 1927)
Frequency	1220 kHz
Hours of operation	day and night
Operating power	0.25 kW (day), 0.076 kW (night)

---

<sup>1</sup> WATX(AM) is licensed for DA operation on 1220 kHz with 1 kW day and 0.305 kW night, using different patterns..

Antenna type  
Antenna height (AGL)

57.9 meter long-wire antenna  
6.1 meters

CML must reduce power or cease operation if complaints of interference are received, and use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **April 27, 2022**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Joe Szczesny". The signature is stylized and cursive, with a large loop at the beginning and a long tail.

Joseph Szczesny, Engineer
