Re: Just Because, Inc. (JBI)
WGFP (AM), Webster, MA
Facility Identification Number: 50232
Special Temporary Authority (STA)
BESTA- 20150727ACA

Dear Mr. Sims:

This is in reference to the request filed on July 27, 2015. JBI requests a further extension of the STA originally granted on April 12, 2012, as last modified on January 10, 2014, to operate Station WGFP(AM) with a temporary cylindrical base insulated monopole due to removal of the licensed tower to allow for operation of experimental station WX3CFA, 1630 kHz, Webber, MA (BPEX-20130402ACY).¹ In support of the request, JBI states that it plans to file a new STA request along with a Special Field Test Authorization (SFTA) request to conduct measurements at 940 kHz using a high efficiency broadband antenna, followed by the filing of an FCC Form 301 construction permit application (in order to license use of that antenna).

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA IS HEREBY GRANTED and station WGFP(AM) may continue to operate from its licensed site with the following facilities:

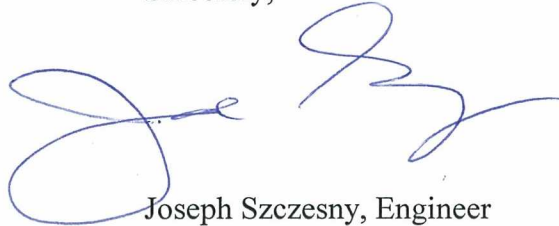

¹ WGFP(AM) is licensed for ND operation on 940 kHz with 1 kW day and 0.004 kW night.

Frequency	940 KHz
Hours of operation	Daytime/Nighttime
Operating power	Not to exceed 1 kW day/0.004 kW night
Antenna type	Cylindrical base insulated monopole
Overall height	14.8 meters

It will be necessary to further reduce power or cease operation if complaints of interference are received. JBI must notify the Commission when licensed operation is restored.² JBI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. We anticipate that JBI will file an acceptable FCC Form 301 application utilizing the non-standard antenna design after testing has been completed, therefore a reduced amount of time is being authorized since JBL plans to file a new STA and SFTA soon, which will eliminate the need for this STA.

This authority expires on **November 26, 2015**.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Joe', is written over the printed name of Joseph Szczesny.
