

**WTVG-DT OPERATION UNDER  
SPECIAL TEMPORARY AUTHORIZATION  
BMDSTA-20030804AFI  
WTVG-DT, TOLEDO, OHIO  
FACILITY ID NUMBER 74150  
DTV CHANNEL 19 795 KW 221.5 M HAAT**

Permittee: WTVG, Inc.

**Compliance with Terms and Conditions of the Construction Permit**

In December, 2002, WTVG-DT filed an application to change antenna type and operate with an ERP of 795 KW, DA-MAX, at 211.5 meters HAAT. This application bears FCC File Number BMPCDT-20021217AAX, and was accepted for filing on December 23, 2002 and was granted on February 10, 2004.

WTVG-DT began operation under Special Temporary Authority with the antenna specified in BMPCDT-20021217AAX and an operating power which was less than that which was specified in the Application for Construction Permit.

In August, 2003, WTVG was nearing completion of the construction of transmitting facilities and would soon be able to operate with a transmitter output power sufficient to develop the Effective Radiated Power which is specified in the outstanding Construction Permit.

On August 14, 2003, the Commission granted an STA request to operate with an ERP of 795 KW at an HAAT of 221.5 meters, which are parameters identical to the outstanding Construction Permit. This STA bears FCC File Number BMDSTA-20030804AFI. An application for extension of this STA bears FCC File Number BEDSTA-20040206AEA. The allocation studies, predicted coverage contours, and compliance with the Commission's Rules regarding human exposure to radiofrequency energy which directly relate to the STA and the outstanding Construction Permit are contained in BMPCDT-20021217AAX in an attached Engineering Statement with associated exhibits, which was prepared by John E. Hidle, P. E. and is dated November 20, 2002. These parameters are identical to those that are specified in the outstanding Construction Permit.

All conditions and notifications which are required by the outstanding Construction Permit were satisfied during the time the application for construction permit was pending, while operating under BMDSTA-20030804AFI. Because of this, the facility is presently operating as described in the outstanding Construction Permit, with all conditions satisfied, and meets the requirements of the Commission's Rules. A grant of this application for license would be in the public interest.
