

EXHIBIT 1

This Minor Change proposal is to slightly increase power of W277AO on its current frequency (103.3 MHz) at its current location (near Enon, Ohio).

This filing is technically the same as BPFT-20130207AAY, which we were unable to exercise, and consequently expired on 03/07/2016. No changes in other nearby stations have been made that would cause an interference concern. We have updated information in this new application, showing actual field strength at azimuths, to more accurately show no interference with other stations.

Bradlee J Beer, licensee of FM Translator W277AO, Facility ID# 138923 has a Rebroadcast Agreement with Radio Maria, Incorporated, the primary station licensee of WULM-AM, Facility ID# 55232.
