Mr. Doak,

Good morning.

ERI has proposed a model MP-8C-DA, eight-bay, full-wavelength spaced side-mounted antenna. My understanding is that this antenna will be a directionalized version of ERI's "rototiller" design.

I hope that answers your question. Please feel free to contact me with further questions or concerns.

With kind regards,

Daniel G. Ryson

Mr. Ryson:

What is the model number of the ERI antenna the applicant proposes to use for BMPED-20110211AFI.

Thank You
