

**Compliance with Special Operating Conditions**  
**Construction Permit file number: BPED-20150416AAL**

The underlying construction permit is for the purpose of correcting the relative field values of the directional antenna to match the constructed facility, see 302-FM file number BLED-20060302AAH. No physical changes were made to the directional antenna system; therefore the original documentation is still accurate. Exhibits 9A, 9B, and 9C use the original documentation to demonstrate compliance.

The WLRK Construction Permit contains several Special Operating Conditions, summarized as follows:

1. Waiver of 47 C.F.R. Section 73.1125 was previously granted to allow operation of the facility authorized by this construction permit as a satellite operation of station KLVR(FM), Middletown, CA (FIN 18801).
2. The permittee/licensee, in coordination with other users of the site, must reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
3. The permittee must provide an affidavit from a licensed surveyor to establish that the directional antenna has been oriented at the proper azimuth.
4. The permittee must submit an affidavit that a qualified engineer oversaw the installation of the directional antenna system.
5. The permittee must provide the results of a complete proof-of-performance to establish the horizontal plane radiation patterns for both the horizontally and vertically polarized radiation components.
6. Before Program Tests are authorized, the permittee must submit an exhibit demonstrating that the measured directional antenna pattern complies with the appropriate community coverage provisions of Sections 73.315 or 73.515.
7. The RMS of the measured relative field horizontal plane directional antenna pattern must encompass at least 85% of the RMS of the relative field horizontal plane directional antenna pattern.
8. The relative field strength of neither the measured horizontally nor vertically polarized radiation component exceeds, at any azimuth, the value indicated on the composite radiation pattern authorized by the construction permit.

Educational Media Foundation ("EMF"), complies with, or agrees to, these conditions, as follows:

1. EMF reiterates the commitments outlined in its request for waiver of section 73.1125. See also Exhibit 6.
2. Educational Media Foundation, in coordination with other users of the site, agrees to reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic

fields in excess of FCC guidelines.

3. See Exhibit 9A
4. See Exhibit 9B
5. See Exhibit 9C
6. See Exhibit 9D
7. See Exhibit 9C
8. See Exhibit 9C

Therefore, all Special Operating Conditions of the WLRK Construction Permit (FCC File Number BPED-20150416AAL) have been met.
