

TECHNICAL STATEMENT  
AGM FORT COLLINS, LLC  
FCC FORM 314  
KRRR(FM), KRQU(FM)

### TECHNICAL STATEMENT

The following is a statement submitted in accordance with section 73.3555(a). It is concerning the market definition and contour overlap of the acquisition of KRRR(FM) Cheyenne, WY and KRQU(FM) Laramie, WY by AGM Fort Collins, LLC.

The data supplied on the following pages of this exhibit was prepared by the following procedure:

First, a composite of the principle community contours for the proposed group of stations (70 dBu/3.16 MV/M for both stations) was plotted (see figure 1). Then every intersecting principle community contour of other commercial FM stations was determined and then plotted (see figure 2 and figure 3).

At this point, fourteen FM stations were found to overlap with the contour composite, so no further study was conducted.

A minimum of 14 stations were found to overlap with the proposed stations to be acquired by AGM Fort Collins, LLC. The requirement for multiple ownership under FCC rules for markets with less than 15 stations, requires a licensee own no more than 50 percent of the stations in the market and that no more than three are in the same service. AGM Fort Collins, LLC is proposing the combination of two FM stations in the defined market. Thus, it is in compliance with Commission rules regarding multiple ownership.
