

MINOR CHANGE APPLICATION
MODIFICATION OF BPFT-20080801AQD
WAY-FM MEDIA GROUP, INC.
W295BH FM TRANSLATOR STATION
CH 295D - 106.9 MHZ - 0.055 KW
SARASOTA, FLORIDA
January 2009

TECHNICAL STATEMENT

This technical statement was prepared on behalf of WAY-FM Media Group, Inc. ("WAY"), licensee of FM translator station W295BH, Channel 295D, Osprey, Florida.¹ WAY seeks to make minor changes in the facilities of W295BH as authorized in BPFT-20080801AQD by relocating the station and increasing height and effective radiated power.

This application proposes to implement these changes for W295BH at an existing tower site. As such, the Federal Aviation Administration was not apprised of this proposal. The structure has been registered and assigned Antenna Structure Registration Number 1231476. Attached as Exhibit A is a study demonstrating that the proposed W295BH translator will not cause interference to any full service station, existing or proposed FM translator station, or any LPFM facility.

Exhibit B1 demonstrates there is common service area between the authorized W295BH and the proposed W295BH herein.

1) An assignment of W295BH to Ringling Center, LLC has been granted (BALFT-20081105ADZ), but to date a Letter of Consummation has not been filed.

Finally, since the proposed translator will be co-located with other FM stations, it was not possible to use the worksheets associated with FCC Form 349 to show the proposal meets the Commission's radio frequency radiation limits. Therefore, attached as Exhibit C is a study that shows the proposed facility is in compliance with the FCC's RF exposure limits.

All data regarding broadcast facilities was extracted from the CBDS database. We assume no liability for errors or omissions in that database which may be adverse to the requests contained herein.
