

Radio Station WAXA
Pine Island Center, FL
1200 kHz, 0.75 kW, U, DA-1

Ground System:

Existing ground system for towers 1, 2 & 3 will be employed. This consists of 120 evenly-spaced #10 AWG copper radials with a radial length of 205 feet (62.5 m) from the base of each tower, except where shorted and bonded to a copper strap as shown. Radials buried 6 to 8 inches below the surface.

ANTENNA GROUND SYSTEM
