

**MINOR CHANGE APPLICATION**  
**APEX BROADCASTING, INC.**  
**KNUF RADIO STATION**  
**CH 221C3 - 92.1 MHZ - 25.0 KW**  
**DEQUINCY, LOUISIANA**  
**December 2003**

**TECHNICAL STATEMENT**

This Technical Statement and attached exhibits were prepared on behalf of Apex Broadcasting, Inc. ("Apex"), licensee of FM radio station KNUF, Channel 221C3, De Ridder, Louisiana. In MM Docket #02-56, the community of license of KNUF was changed to DeQuincy, Louisiana. Apex herein proposes to implement the change in community and make other minor changes to the facilities of KNUF by relocating the site, increasing the effective radiated power of the station and lowering the antenna height above average terrain.

Since Apex is proposing to locate KNUF on a new tower, the Federal Aviation Administration ("FAA") has been apprised of this proposal. Once the FAA issues a Determination of No Hazard, the tower will be registered with the Commission. It is noted that from the proposed KNUF site, Channel 221C3 does not meet the minimum distance separation requirements to a pending application for a new station on Channel 220C1 at Kaplan, Louisiana. Therefore, processing pursuant to §73.215 is requested. See Exhibit A for details.

Due to the power of the proposed facility and its height above ground, it was not possible to demonstrate compliance with the Commissions radio frequency radiation limits with the

worksheets associated with FCC Form 301. Therefore, attached as Exhibit B is a study which shows the proposed KNUF facility is in compliance with the RF limits. All other data used to certify the information contained in the application has been forwarded to Apex and is available for submission to the Commission upon request.
