

Compliance with 47 C.F.R. 73.207

The proposed facility meets all minimum distance separation requirements with regard to co-channel, first, second, or third adjacent channel stations, and those separated by 53/54 channels, except for the license of KPLZ Channel 268C (FIN 21663) which is 2.60 kilometers short-spaced to the proposed facility.

This application proposes contour protection for KPLZ according to the guidelines of 47 C.F.R. 73.215. The minimum separation requirement as stated by 47 C.F.R. 73.215(e) is 142 km between a class C and a class A facility which are first adjacent.

The station table on page two of this allocation study shows that KPLZ is separated from the proposed facility by 161.9 km

Therefore, the proposed facility is permitted to use contour protection toward the short-space facilities (See Exhibit 33 for compliance with contour protection requirements).
