

Exhibit 6
Engineering Statement
in support of an Minor Change
to WDES, Ch 48, Displacement Application

BACKGROUND

Applicant has a license to operate channel 48, WDES in Destin, FL. This application requests a change to channel 32.

Additional Interference Considerations

Interference to the following stations was studied using “Population Loss Studies” based on the “Longley-Rice Terrain Algorithm” in accordance with OET Bul 69.¹

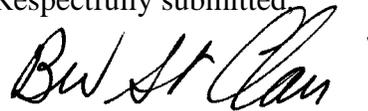

BMPEDT-19991217ABX, WSRE, Ch 31, Pensacola

BLCT-20020131ACG, WNCN, Ch 32, Montgomery, AL

BLEDT-20030730ACW, WFSU-TV, Ch 32, Tallahassee, FL

Population loss less than 0.5%

Respectfully submitted,

B. W. St. Clair
Engineering Consultant
October 7, 2005

¹ The analysis was performed on a Sun “Blade” computer using the exact replica of the FCC program. Population losses of less than 5% are not reported in detail. Only an indication of no interference is shown.
