

Request for Modification of Main Studio Waiver

Family Stations, Inc. ("FSI"), licensee of Station KQFR (FM), Facility ID No. 90517, Rapid City, SD, respectfully requests a modification of its waiver of the Commission's main studio rule, 47 C.F.R. Section 73.1125, to allow KQFR, a satellite station of KYFR (AM), Facility ID No. 20806, Shenandoah, IA, to become a satellite station of KEAR (AM), Facility ID No. 1082, San Francisco, CA, the main studio of which is located at the FSI Network headquarters in Oakland, CA, and to permit KQFR to satisfy the public file requirement through Internet access rather than requiring a paper file to be maintained in Rapid City, SD.

The Commission has repeatedly recognized the benefits of centralized operations for NCE stations, given their limited funding, and thus has found that good cause exists to waive the main studio rule where NCE satellite operations are proposed. *See, e.g., Letter from H. Taft Snowden to Alan C. Campbell*, 1800B3-MH (2002) (granting waiver of the main studio rule to permit WEFR (FM), Erie, PA to operate as a satellite of co-owned WJCH (FM), Joliet, IL) ("*WEFR Waiver*"); *Delmarva Education Association*, 19 FCC Rcd 6792 (2004); *Amendment of Section 72.1125 and 73.1130 of the Commission's rules*, 3 FCC Rcd 5024, 5027 (1988). In each such case, the Commission staff determined that the waivers were justified on the basis of the limited funding available to the stations, the increased efficiencies resulting from co-location of studios, and the public interest benefits that result from such satellite operation.

FSI is a non-profit corporation that produces and delivers, via satellite or Internet delivery, FSI (Family Radio Network) noncommercial educational programming to more than 60 NCE radio broadcast stations across the United States. The majority of the FSI stations currently operate pursuant to main studio waivers. *See e.g., WEFR Waiver, supra.*

KQFR is one of those stations, and it has successfully operated as a satellite station for over 8 years without complaints from the community about its lack of a local main studio. However, the requirement to maintain a paper public file in Rapid City, SD, is a financial and administrative burden which diverts FSI's limited resources from its programming efforts; if FSI is able to centralize the public file operations of KQFR with other stations using its website, it will be able to substantially reduce its compliance costs and direct more money to its programming, while making it easier for residents to obtain the information it contains.

In consideration of the public interest obligations incumbent on broadcast licensees, FSI proposes the following to ensure that KQFR fulfills its local service obligations to the residents of Rapid City, SD: (i) on at least a quarterly basis an employee representative of FSI will conduct

interviews and surveys of local community leaders and residents to ascertain the needs, interests, and concerns of Rapid City listeners, which feedback will be used to develop responsive local public affairs programming; (ii) FSI will establish and advertise a toll-free telephone number for use by residents of Rapid City to contact FSI personnel about the station; and (iii) FSI will make the contents of the KQFR public inspection file, which will be maintained at the KEAR studio, available on the Internet and provide accommodations for listeners wishing to review the contents of the public file.

In light of the foregoing, pursuant to Section 73.1125(b)(2) of the Commission's rules, FSI requests that the Commission find that the public interest will be served by the modification of KQFR's main studio waiver to allow it to operate as a satellite station of KEAR (AM), San Francisco, CA, and to allow for the positing of its public file on the Internet instead of at a location in Rapid City, SD, and therefore that good cause exists to grant a modified waiver of the main studio rule in this instance.
