March 24, 2008

In evaluating the proposed move for digital station K47JC FID 130216 with an ERP of 2.25kW, an outgoing interference study was executed using the OET-69 Longley Rice methodology. The stations listed in the table below showed possible interference. When these stations were evaluated for outgoing interference, there was zero percent interference present found in each case when rounded to the nearest whole percent.

Callsign	City	Fac ID	ARN	Class	Ovl Pop%
