### Exhibit 1 Expedited Processing Requested

*Due to circumstances beyond our control, the tower owner lowered our height at the time we were signing the final lease agreement. As a result, RMG is respectfully requesting expedited processing.*

The specified height above ground level of 50 meters was originally available, but, due to circumstances beyond our control, the tower owner had to lower our height as we were signing the final agreement. The COR was lowered by 10 meters to 40 meters above ground level. This reduces the maximum distance (of the 12 evenly spaced radials) to our coverage areas and interference contours as follows:

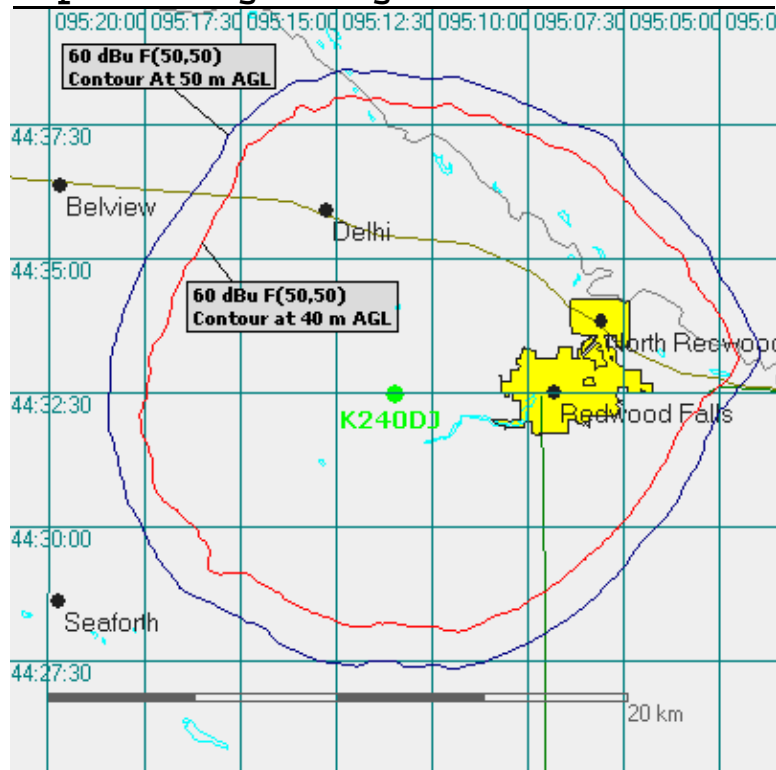

Original distances to contours at 50 meters AGL (83.2 meters max of 12 radials:-)

60 dBu F(50,50): 11.7 km ; 40 dBu F(50,10): 40.2 km; 54 dBu F(50,10) 17.1 km; 100 dBu F(50,10) 1.1 km

New distances to contours at 40 meters AGL (73.2 meters max of 12 radials:-)

60 dBu F(50,50): 11.1 km ; 40 dBu F(50,10): 37.6 km; 54 dBu F(50,10) 15.8 km; 100 dBu F(50,10) 1.1 km

### Map Showing Change in Service Area

### Transmitting Antenna:

The antenna is being changed from an Armstrong FMA-2 2 element to an Armstrong FMA-1 single element.
