

**Environment Impact & RFR Compliance Statement**

FM translator K243BP will be located at an established communications site that is in compliance with all environmental impact requirements.

K243BP will operate with an ERP of 0.060 kW (H&V, non-DA) at an antenna COR AGL height of 5 meters.

Per Section 1.1307(b)(1) Table 1, any Part 74 Subpart L facility with an ERP of 100 watts or less is categorically excluded from environmental evaluation. Therefore K243BP as proposed will be in compliance with all RFR requirements.

RFR hazard warning signs will be posted at the site and the site has restricted access to only authorized personnel. The applicant certifies that in cooperation with other users of the site all authorized personnel will be protected from RFR exposure in excess of FCC guidelines while accessing any controlled exposure area, including the tower, by either reducing power or ceasing operations. Information pertaining to the contact representative of the facility will be posted.
