

# **Exhibit 1**

Prepared by Guy Smith in connection with Silent STA request for KLBB-LP

## **Reason for STA request**

In a recent electrical storm, the Ramar tower in Lubbock, TX suffered lightning damage. The antenna combiner that combines KLBB-LP and KXTQ-CA, Ch.46, Facility ID #55055, into a common antenna, was damaged beyond immediate repair. As it was no longer possible to operate both stations it was decided to discontinue operating KLBB-LP until the combiner can be repaired or replaced. No time frame has been established at this time, but it is anticipated that operation can be restored in 60 days or less.
