

**INTERFERENCE CERTIFICATION**

Applicant has utilized the latest version of Comstudy 2.2.12.56, an engineering software program, to ascertain possible interference concerns. This program computes both contour and Longley-Rice interference. Having completed those computations, there was no interference found. Consequently, this application may be granted.

**ADJACENT CHANNEL WAIVER REQUEST  
as it relates to  
BNPTVL-20000830ADE, Channel 5, Panama City, Florida**

Following the engineering constraints outlined in FCC Rule 74.705 (d)(3) and utilizing the Comstudy 2.2.12.56 software program to examine compliance with the Rule, the station does not cause harmful interference to this applicant. This is due to the co-location of the two applicants. Consequently, this application may be granted.
