Directional Antenna Installation Certification

As the KVSS project engineer, I was responsible for the correct placement of the KVSS directional FM antenna. This KVSS directional FM antenna was placed on the existing KCRO AM tower located at 64th and Hartman Street in Omaha, Nebraska.

The KCRO AM tower that the KVSS directional antenna was placed on was a 500 foot modified Advance Industries 4000 guyed tower.

As per FCC Regulation 73.316, the KVSS directional antenna was placed at 36 degrees azimuth, True North.

Dated: February 12, 2003
