Pinebrook Corporation  
PO Box 616  
Cuyahoga Falls, OH 44222

Re: Pinebrook Corporation (PC)  
WINW(AM), Canton, Ohio  
Facility Identification Number: 8549  
Special Temporary Authorization (STA)  
BESTA-20170530ACI

Dear Mr. Perry:

This is in reference to the request filed on May 30, 2017. PC requests a further extension of the STA granted on February 24, 2012, to operate ND from an alternate site pending the grant of BP-20161028ABE to construct a new permanent facility due to loss of the licensed site.<sup>1</sup> In support of the request, PC states that it plans to move forward with construction as soon as possible after BP-20161028ABE has been granted.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Accordingly, the request for extension of STA is hereby GRANTED, and PC may continue to operate using an emergency wire antenna at geographic coordinates NLAT 40° 48' 32", WLONG 81° 22' 35" W (NAD 1927), with a maximum of 0.25 kW daytime. It will be necessary to further reduce power or cease operation if complaints of interference are received. PC must use whatever means are necessary to protect workers and the

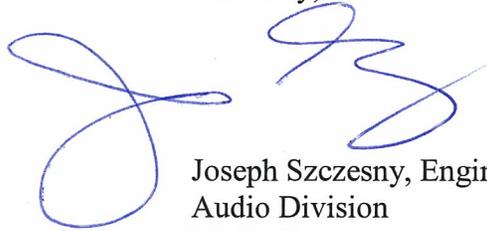

---

<sup>1</sup> WINW is licensed for 1 kW daytime-only DA operation on 1520 kHz, and BP-20161028ABE proposes a new ND facility with 0.24 kW during critical hours and 0.37 kW daytime at a new transmitter site.

public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR §1.1310.

This authority expires on **December 29, 2017**.

Sincerely,

A handwritten signature in blue ink, consisting of a large loop followed by a series of smaller, connected loops.
