

APPLICATION FOR STATION LICENSE
CUMULUS LICENSING LLC
K253CF FM TRANSLATOR STATION
CH 253D - 98.5 MHZ - 0.25 KW
COTTAGE GROVE, OREGON
June 2017

TECHNICAL STATEMENT

This Technical Statement was prepared on behalf of Cumulus Licensing LLC ("Cumulus"), licensee of FM translator station K248AG, Channel 248, Cottage Grove, Oregon. Cumulus holds a construction permit (BPFT-20160502AAW) to change the K248AG channel from Channel 248D to Channel 253D. The change in channel triggered a change in call sign from K248AG to K253CF, which will be used hereafter in this application when referencing this translator. This instant application seeks a license to cover the outstanding construction permit. Exhibit A is a calculation of the transmitter power output for K253CF.

There are two special operating conditions/restrictions listed on the K253CF permit. The first condition states:

"The permittee/licensee in coordination with other users of the site must reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines."

Cumulus pledges compliance with this condition.

The second condition states:

"Prior to commencing program test operations, FM Translator or FM Booster permittee must have on file at the Commission, FCC Form 350, Application for an FM Translator or FM Booster Station License, pursuant to 47 C.F.R. Section 74.14."

This application satisfies that condition. Based on the foregoing, it is believed that Cumulus has complied with all conditions and can operate K253CF in accordance with Commission's rules.
