Brian Marshall
Vermont Public Radio
365 Troy Avenue
Colchester, Vermont 05446

Subject: Vermont Public Radio, Station WVTI, Brighton, Vermont Antenna Location and Orientation

Dear Brian:

This letter is certification of the installation of the Directional Antenna for the above referenced radio station.

Observations were recorded on Wednesday, September 17, 2008. Little River Survey Company, LLC's survey control was established using survey grade dual frequency GPS equipment and the Vermont CORS network.

The NAD27 geographic coordinates for the antenna are:

North $44^{\circ} 47' 02''$
West $071^{\circ} 53' 13''$

Antenna orientation is based on a perpendicular line to the top mounting bracket rod at a True North Azimuth of $270^{\circ} 21'$.

The average antenna height was 12.5 +/- meters above the ground at the orthometric elevation of 693.9 +/- meters NAVD 88. NGVD 29 is approximately 0.33 meter above NAVD 88 in this area.

Sincerely,

Patricia S. Kules, L.S.
Licensed Land Surveyor
