

Exhibit 9
Engineering Statement
KFRG(FM) Ch. 236B San Bernardino, CA
Facility ID 1241

CBS Radio Stations Inc. (CBS), licensee of Radio Station KFRG(FM) San Bernardino, CA, herein seeks Program Test Authority and a license to “cover” Construction Permit BXPB-20151120AVE. This exhibit, along with the attachments referenced below, demonstrates that the constructed facility complies with the special operating conditions in the Construction Permit.

- Condition 1: Antenna Proof of Performance¹
- Condition 2: Surveyor’s Certification¹
- Condition 3: Engineer’s Statement¹
- Condition 6: RF Field Measurement Report¹

Information contained in the Antenna Proof of Performance shows compliance with Condition 4, which specifies the maximum effective radiated power, the azimuth of the directional antenna minima, and the maximum relative field limit at that azimuth.

The RF Field Measurement Report revealed no publicly accessible location that exceeds the FCC’s general population/uncontrolled maximum permitted exposure (MPE) guideline. As specified in Condition 8, CBS agrees to coordinate with other users by reducing power or ceasing operation as necessary to prevent persons having access to the site or to the adjacent tower from RF exposure that would otherwise exceed the MPE guideline. Additionally, as stated in the Engineer’s Statement, appropriate RF signage has been installed.

¹ See Attached.
