**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of Emmis Austin Radio Broadcasting Company, LP (“Emmis”), licensee of FM translator station K259AJ, Channel 259D, Austin, Texas. Emmis has a construction permit for make minor changes in the K259AJ facilities (BPFT-20110118ACX). An application for station license to cover the permit has been submitted (BLFT-20110607ABI), but a typo in the length of the transmission line resulted in an incorrect transmitter power output. Exhibit A is an updated calculation of the transmitter power output for FM translator K259AJ.

There are two special operating conditions/restrictions listed on the K259AJ permit. The first condition states that submission of an application for station license, FCC Form 350, prior to commencing program tests with the facilities authorized in the permit is required. The submission of this instant application satisfies the condition. The second condition states that Emmis will reduce the power of K259AJ or cease operation to insure persons with access to the site are not exposed to radio frequency radiation levels above the limits. Emmis states that it will, in cooperation with other tower users, reduce the power of K259AJ or cease operation, as necessary, to insure that persons having access to the tower will not be exposed to radio

frequency electromagnetic fields in excess of the FCC's guidelines. Based on the foregoing, it is believed that all conditions have been satisfied and K259AJ has been constructed in compliance with the Commission's rules.
