Gentlemen:

On behalf of our client, Ramon A Hernandez, applicant of a new DLPTV station on Channel 20, Humacao, PR (FCC File Num. BNPDTL-20101013ACS) in accordance with Section 73.1030 of the FCC Rules, we are hereby notifying you of the proposed amendment of said application. The particulars of the proposal are as follows:

Proposed Facility:

Geographical coordinates of antenna location (NAD83): 18-06-39.4 / 66-03-05.0
Antenna height (radiation center): 25 m AGL; 905 m AMSL
Max Antenna Gain: 12.2 dBd
Main Lobe Orientation: 165° True
Digital Channel: 20 (Mid Freq. 509 MHz)
Type of emission: 6M00D7W
Max. Effective isotropic radiated power (horizontal polarization, average power): 22.14 kW

This application amendment proposes no change in frequency; an ERP increase to 13.5 kW ERP, a different site and the use of a full service mask (to provide better out-of-band emission filtering) is proposed.

Please review this proposal and let us know your findings. Please feel free to communicate via email ([mailto:Grafton@dlr.com](mailto:grifton@dlr.com)), telefax (941-329-6030) or regular mail.

Very truly yours,

Grafton Olivera, P.E.
