Lois,

With Friday morning's high wind event our Burney office was decimated with a couple good size tree snap outs, and it is likely the building will not be restored. At this point I do not believe electrical power at the building site is likely near term, or at all, and relocation of the translator will be necessary.

Please contact me by email or my mobile phone 530.941.3415 to arrange for entry into the building for your equipment.

John
